Inverter - Fronius Symo 15kW (3 phase) inverter

System capacity – 15kW

Annual savings - approx \$5,500

Power production – Approx 20,000 kWh's per year

Carbon savings – Approx 24 Tonnes per year

THE STORY.

Gippsland Solar have been working closely with the team at Kingbuilt Homes for many years. Together, we have been offering a Solar Power solution for their new homes, and providing a complete package to reduce their clients ongoing running costs.

When Kingbuilt decided to Solar Power their own product showroom in Moe, naturally they turned to Gippsland Solar for a solution. We installed a 15kW (60 panel) system, using the highest quality REC panels, with guaranteed performance in low-light, and also in the heat of Summer.

We also installed a premium Fronius Symo (3 phase) inverter, made in Austria. Fronius is our top-of-the-range inverter, with a 10 year warranty. The most important feature is the 'remote monitoring', which allows our electricians and office staff to monitor the system performance remotely on our computer or smartphone, with the data updating every 5 seconds.

Importantly, this inverter also has email or text alerts, so we will know straight away if there is an issue with the inverter (even if there is simply a grid outage). In the unlikely event of a system fault or issue, our staff will know there is a problem before the client even does! This peace of mind is another reason why we are Your Local Solar Experts.

"Hey Andy, thanks for the follow up. Yes the system was installed and completed this morning. The boys were very professional, they even came in early so they could turn the power off for a minute and commission the system, before we got busy for the day.

Very impressed with your team, they left the place clean, and explained how to set the monitoring up on my phone. You've got a great team there, they are a very professional crew.

Cheers, Lochy."
